WASHINGTON D.C.

Dr. Aramesh Darvishian, DDS

PERFECT SMILES OF RESTON / FOUNDER

Dr. Aramesh Darvishian owes not just her career to cosmetic dentistry but also her outlook on life. More than 25 years ago, transformative orthodontic treatment gave her a new smile and renewed her outlook on life. Her passion for helping others experience the same has only deepened through the years with her practice, Perfect Smiles of Reston.

"My patients come from all walks of life, and their unique stories and needs challenge me to continually innovate and personalize my care," Darvishian says. "It's the human connection that truly drives my creativity and vision."

While Dr. Darvishian earned her doctor of dental surgery degree at Virginia Commonwealth University, her dedication to helping her patients feel their best stirred her to expand her practice to aesthetic medicine. Perfect Smiles of Reston's med spa arm offers Botox, hair restoration, laser resurfacing and more treatments for a personalized approach driven by the latest digital technology.

"These tailored treatments not only enhance smiles—they boost overall wellness, beauty and confidence," she shares.

Outside her practice, Dr. Darvishian gives back by donating to St. Jude Children's Research Hospital and sponsoring local school sports teams. She also provides dental care to underserved populations and mentors aspiring dentists. "No matter how advanced our technology becomes," she says, "compassion and service will always be the core of my practice."

To do it all, this Dynamic Woman says that balance is key. It's a trait she honed as she studied dentistry and opened her practice, all while raising two children.

"I cherish quality time with my children and take a holistic approach to life, just as I do with my dental philosophy, blending science, beauty and wellness in perfect harmony," Dr. Darvishian says.
