

Aramesh Darvishian, DDS

PERFECT SMILES OF RESTON

Dr. Aramesh Darvishian's path to cosmetic dentistry began over 22 years ago when orthodontics changed her life, thanks to braces, which she said perfected her smile, boosted her confidence, and reshaped her outlook. That transformation sparked her mission to offer others the same life-changing experience.

At Perfect Smiles of Reston, Dr. Darvishian has achieved remarkable status as a Top 1% Invisalign Provider after completing thousands of cases. Yet she measures success differently. "The real defining moments are patients' tears of joy at their new smiles—mirroring my own life-changing moment," she says.

Digital innovation drives her practice forward with tools like CAD/CAM AI software and in-office 3D printing, which she is excited about. This technology allows her team to restore tooth structures with precision and speed. "Combined with Invisalign, veneers, and aesthetic treatments like Botox and laser resurfacing, our customized packages create harmonious, stunning results that elevate beauty and confidence," she says.

Despite sophisticated technology, human connection remains central to her practice. "I listen intently, envision their potential, and guide them every step, turning treatment into a trusted, transformative journey," she says.

But it's not all work and no play. Dr. Darvishian finds the energy for transformative dental work through balance. Her days begin in her "early morning sanctuary" of the gym, while yearly international trips provide fresh inspiration. She also cherishes quality time with her children—a holistic approach to life that mirrors her comprehensive dental philosophy.
