

# Dr. Aramesh Darvishian, DDS

PERFECT SMILES OF RESTON

## *My Washington D.C. Story*

"I was born in Iran and moved to Washington, D.C. at 13. Navigating a new country as a teenager was challenging, but my parents' sacrifices gave me a deep sense of responsibility—to work hard, dream big and seize every opportunity. My passion for dentistry began during my orthodontic journey, when I saw firsthand how braces transformed my smile and confidence. That experience sparked my desire to help others feel the same way."

## *Shaping the Local Landscape*

"Balancing two young children and a new practice in Reston tested my resilience, but it also fueled my dedication. Over the past 20 years, I've completed thousands of Invisalign cases and often combined orthodontics with porcelain veneers for transformative results. Today, my focus extends beyond dentistry—framing radiant, natural and confident smiles with advanced aesthetic treatments like Botox and laser resurfacing. By merging technical precision with an artistic eye, my practice has become a destination for radiant, natural confidence."

## *My Next Chapter in Washington D.C.*

"My mission is to keep expanding an integrative approach to beauty and health. Beyond dentistry, I've embraced advanced aesthetics—Botox, laser resurfacing, IPL and hair revitalization—to help patients achieve full facial harmony. My goal is simple but profound: to leave every patient feeling confident, healthy and balanced. Washington has given me the platform to serve and I hope to continue creating life-changing transformations that empower people to share their best selves with the world."
